PRILA., Dec. 14th, 1817.

DEAR SEE:—In reply to your question respecting the use of Dr. Drake's Paracea, I will ray, that although a perfect lisbellever in the existence of a Pasacea, or cure for all liseases, however valuable it may be in certain conditions of the system, still I have believed that a cure for Consumption would be discovered sooner or later, and curto-sky led ne to try your medicine in two very inveterate cases. They were pronounced by the attending physicians to be relationally consumption, and abandoned by them as in transmit. One of the persons had been under the treatment of several very able practitioners for a number of cars, and they said she had "old fashi und Consumption combine with Serodial," and that she might linger for some ime, but could not be persons have most gratifying. Only four or five battles were used by one of the persons before the begun to improve rapidly. The other took about ten, will only add that familier as I am with consumption by abertance and by extensive observation as a study, and I will only add that familiar as I am with consumption by inheritance and by extensive observation as a study, and knowing also the injurious effects in nine cases out of ten of far, boneset, and other vegetable tonics, as well as of recommends the task of prince's boneset as well as of recommended by the boneset boneset between the part of the property of the pro

It is not as Opiste—it is not sail Experiorant. It is not intended to full the invalid into a failal security. It is a great remedy—a grand healing and curative c another, the great and only remedy which medical science nod skill has yet produced for the treatment of this hitherto uncompared malady. And for the treatment of this hitherto meconquered malady. And no person afflicted with this dread disease, will be just to himself and his friends, it he go down to the grave without testing its virtues. A single battle, in most cases, will produce a favorable change in the condition of any potient, however low."

TO THE LADIES. Ladies of pale complexion and consumptive habits, and such as are debiliated by those obstructions which females are liable to, are restored by the use of a bottle or two, to bloom vigor. It is by far the best remody ever discovered for weakly children, and such as have bad humors; being pleasant, they take it. It immediately restores the appelite, strength and color.

Nothing can be more surprising than its invigorating ef-

strength and color.

Nothing can be more surprising than its invigorating effects on the human frame. Persons, all weakness and institude before taking it, at once become robust and full of energy under its influence. It immediate counteracts the nervelessness of the female frame.

Thus, if the Liver be affected, one ingredient will operate on that particular organ, and, by cleaning it of an Excess of Bile restore it to its natural state. Another will operate on the Blood, and remove all impurities in its circulation; while a third will effectually expel whatever impurities may have been discharged into the stomach, and hence they states at the Blood and remove all impure Humors from the body; open the perse externally and internally; aspects all foreign and obsolious particles from the chyle, so that the blood may be thoroughly pure—thus securing a free and heathy action to the Heart Lungs and Liver; and thereby they asserted the results and their virtues are as positive and certain in restering Health, that the proprietor binds himself to return the money paid for them in all cases where they do not give universal satisfaction.
